

# Zack and Sarah Loving Gabriel, Gideon, and Grady

## Missionaries Through Aviation October 2021

Thank you for your love, prayers, and support during these exciting days! We want to encourage you that our God is alive and well and working on your behalf. Like the Covid tests we received this spring in Texas before we departed for Thailand on March 10 (which was also our 14<sup>th</sup> wedding anniversary)— full price those tests would have cost the five of us \$1,600 but, thanks to God’s intervention and some phone calls from friends, they were free! Or the fact that the donations given toward that trip were the exact amount of our flight and quarantine hotel costs— coincidence? We think providence!

2 Corinthians 9:8 says, *“And God is able to bless you abundantly, so that in all things at all times, having all that you need, you will abound in every good work.”* We

are convinced that we will

abound in this good work He has given

us, and we’re equally convinced that He’s got a good work for you too! We are all called to something great because we’re all called to people. People are at the heart of what God is doing. If you teach, help, give, encourage, or work with others you’re a direct link between that person and the Lord. Don’t miss that miracle and be sure to invest in the people within your sphere of influence.

As the verse says, we want to “abound” in the work we’ve been given. For the next three months we’ll be in Alaska, we’re excited to be on mission wherever we are, sharing hope along the way!

This year we began a UAV (unmanned aerial vehicles) program to deliver medicine, vaccines and other supplies autonomously. What a time-saver and literal life-saver it will be to quickly dispatch a UAV for delivering medicine to remote locations. Big thanks to our friends at ITEC for their training and help with this tool! Please pray for its continued development!

This little baby can travel up to 80 miles roundtrip, automatically drop its payload, return and autoland – all via GPS!

Congratulations to our friend and FBR coworker Kittikoon who earned his FAA Flight Instructor certificate this year! Kit spent January-February with us in Texas and worked hard toward this accomplishment! This brings Kit’s 7+ years of aviation training full circle and allows him to begin training FBR pilots.

*Run for Relief in Lumberton, TX*

*Sarah and the boys packing supplies for FBR Good Life Club packets at our Thailand office*

*Gideon and Zack after a day of work on the FBR plane avionics project*

Whether our family is in Texas, Alaska, or Thailand, we have enjoyed working with so many different people and helping encourage and strengthen friends along the way! God is always good, always faithful, and always has opportunities for us to partner with him in Kingdom work.

A large portion Zack's time this spring was given to an avionics upgrade in FBR's Cessna 172. Simplifying and upgrading the instrument panel makes our operation safer and more reliable during the months of heavy pollution each spring in Northern Thailand. We're thankful for our partnership with PF Flyers of Greenville, SC for their support, expertise and help on this project!

**Before**

**After**

We returned to Texas in July to host Kawsay and his wife Lele and train him toward his private pilot license. Kawsay and Lele direct FBR's Medical Patient Care program.
